CLIENT: EDWIN RODRIGUEZ

OPEN FRIDGE - WEBSITE

Intro:

This website should make it easier for users to find recipes. Online by allowing the user to search for items that they have in their fridge.

Client Description:

The client would like a website that can do a recipe reverse search, you should be able to create an account on the website, look up and search the recipes on the website, search by ethnicity or type of food. The website must also have the ability to have social interactions with other users on the site as well as a rating system for the recipes.

Requirement:

1. Find recipes that the user can make based off ingredients that they have on their fridge
2. Find recipes based of Ethnicity or type of food.
3. Users should be able to share recipes with other users on the website
4. Create their own recipes
5. Have friends and see their friend's recipes
6. Rate and comment on recipes

Non-essentials:

1. Social media interaction

Baseline for Evaluation:

The evaluation for the completed product will consist of the user searching for recipes on the website by ingredients. The user will also create an account on the website and will then proceed to create a recipe on the website. The user should be able to rate and comment on a recipe.
